Long-time Signatory of the UN PRI<sup>1</sup> - 6,527 meetings voted, 698 engagements, 249 milestones achieved<sup>2</sup>

<sup>1</sup>BMO Global Asset Management Incl, together with its affiliate BMO Investments Inc., as BMO Global Asset Management (BMO GAM), has built upon and continues offering ESG/sustainable solutions first offered by the F&C Asset Management plc group of companies in 1984. BMO GAM and F&C Asset Management plc group of companies were affiliates from May 2014 until their sale in November 2021. F&C Asset Management plc group of companies are no longer affiliates of BMO GAM. <sup>2</sup>Source: BMO Global Asset Management for the period January through December 2023 This includes engagement and proxy voting activities conducted on behalf of BMO GAM by Responsible Engagement Overlay (reo®), a third-party service, for the period January through December 2023. A milestone is considered when a company makes tangible improvements in its policies and practices that align with our engagement and proxy voting activities.

## Comprehensive Fixed Income ETFs

**Duration:** A measure of the sensitivity of the price of a fixed income investment to a change in interest rates. Duration is expressed as number of years. The price of a bond with a longer duration would be expected to rise (fall) more than the price of a bond with lower duration when interest rates fall (rise).

**Yield to maturity (YTM):** The total expected return from a bond when it is held until maturity - including all interest, coupon payments, and premium or discount adjustments.

Active Alpha-Seeking Strategies

**Alpha:** A measure of performance often considered the active return on an investment. It gauges the performance of an investment against a market index or benchmark which is considered to represent the market's movement as a whole. The excess return of an investment relative to the return of a benchmark index is the investment's alpha.

## ETF Spotlight

### Buffer ETFs

Your S&P 500 Exposure, With Downside Protection

- [ZJAN](#) – BMO US Equity Buffer Hedged to CAD ETF – January
- [ZAPR](#) – BMO US Equity Buffer Hedged to CAD ETF – October
- [ZJUL](#) – BMO US Equity Buffer Hedged to CAD ETF – October
- [ZOCT](#) – BMO US Equity Buffer Hedged to CAD ETF – October

#### Why Buy?

- If you have clients sitting on the sidelines in cash, who are nervous about market valuations after years of strong returns – buffers are a great way to get some market exposure while protecting on the downside
- For conservative investors, who run the risk of not having enough equity exposure over the long-term
- Ability to participate in some upside potential of the BMO S&P 500 Hedged to CAD Index ETF (ZUE), up to a pre-determined cap, with a buffer zone to mitigate losses (-15% downside protection if held from inception to the end of the Target Outcome Period)<sup>1</sup>
- Management Fee: 0.65%,
- Risk Rating: Medium

**Get Comfort When You Need it the Most:** Four ETFs with a built-in buffer to help mitigate losses, and potentially provide you with greater certainty over time. [Read more from our Buffer ETFs Sales Aid.](#)

All investments involve risk. The value of an ETF can go down as well as up and you could lose money. The risk of an ETF is rated based on the volatility of the ETF's returns using the standardized risk classification methodology mandated by the Canadian Securities Administrators. Historical volatility doesn't tell you how volatile an ETF will be in the future. An ETF with a risk rating of “low” can still lose money. For more information about the risk rating and specific risks that can affect an ETF's returns, see the BMO ETFs' prospectus.

All logos and trademarks of other companies are the property of those respective companies.

<sup>1</sup> BMO Buffer ETFs seeks to provide income and appreciation that match the return of a Reference Index up to a cap (before fees, expenses and taxes), while providing a buffer against the first 15% (before fees, expenses and taxes) of a decrease in the Reference Index over a period of approximately one year, starting from the first business day of the stated outcome period. Provided investors remain invested throughout the duration of the Target Outcome Period. The Target Outcome Period for ZOCT is approximately one year from the first business day of October of each year to on or about the last business day of September of that year. The Target Outcome Period for ZJAN, is approximately one year from the third Friday of January of each year to on or about the third Friday of January of the following year. The Target Outcome Period for ZAPR, is approximately one year from the first business day of April of each year to on or about the last business day of March of the following year. The Target Outcome Period for ZJUL is approximately one year from the first business day of July of each year to on or about the last business day of June of that year

<sup>2</sup> **Return (risk-adjusted):** A measure of investment performance taking into consideration how much risk/volatility was assumed to generate it. Consider two investments, both of which return 10% over a given time period. The investment with the greater risk-adjusted return would be the one that experienced less price fluctuation. Two of the most commonly used measures of risk adjusted returns are Sharpe and Sortino ratios.

### Liquid Alternatives

Potential to profit in an up or down market

[ZLSC](#) - BMO Long Short Canadian Equity ETF

[ZLSU](#) - BMO Long Short US Equity ETF

#### Why Buy?

- Long and short positions within a portfolio to capitalize on rises and declines in stock prices at the same time.
- Potential for stronger risk-adjusted<sup>2</sup> performance than long-only equity funds, and to enhance returns in turbulent markets within Canada or the US
- Revolutionizing liquid alts (intraday liquidity, full transparency, no performance fees, no rigorous additional documentation or high minimums required)
- Management Fee: 0.65%;
- Risk Rating: Low to Medium

**Benefit from both directions of price movements within the Canada or the U.S. market. Please see our [Why invest in BMO ETF's Long-Short Strategy - Sales Aid](#)**

Management Expense Ratios (MERs) are as of September 30, 2023, unless denoted by a dagger (†), in which case the MERs are estimated as the funds are less than one year old. FE = Front-end, LL = Low Load. Low Load and DSC purchase options are no longer available for sale.

The cost of the underlying ETFs are included in the MERs of the ETF based BMO Mutual Funds. BMO Mutual Funds refers to certain mutual funds and/or series of mutual funds offered by BMO Investments Inc., a financial services firm and separate legal entity from Bank of Montreal. Commissions, trailing commissions (if applicable), management fees and expenses all may be associated with mutual fund investments. Please read the fund facts or prospectus of the relevant mutual fund before investing. Mutual funds are not guaranteed.

View roadmap online on the [ETF Dashboard](#).

## Roadmap Disclaimer

Distribution yields are calculated by using the most recent regular distribution, or expected distribution, (which may be based on income, dividends, return of capital, and option premiums, as applicable) and excluding additional year end distributions, and special reinvested distributions annualized for frequency, divided by current net asset value (NAV). The yield calculation does not include reinvested distributions. **Distributions are not guaranteed, may fluctuate and are subject to change and/or elimination. Distribution rates may change without notice (up or down) depending on market conditions and NAV fluctuations.** The payment of distributions should not be confused with the BMO ETF's performance, rate of return or yield. If distributions paid by a BMO ETF are greater than the performance of the investment fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a BMO ETF, and income and dividends earned by a BMO ETF, are taxable in your hands in the year they are paid. **Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero.**

Cash distributions, if any, on units of a BMO ETF (other than accumulating units or units subject to a distribution reinvestment plan) are expected to be paid primarily out of dividends or distributions, and other income or gains, received by the BMO ETF less the expenses of the BMO ETF, but may also consist of non-taxable amounts including returns of capital, which may be paid in the manager's sole discretion. To the extent that the expenses of a BMO ETF exceed the income generated by such BMO ETF in any given month, quarter, or year, as the case may be, it is not expected that a monthly, quarterly, or annual distribution will be paid. Distributions, if any, in respect of the accumulating units of BMO Short Corporate Bond Index ETF, BMO Short Federal Bond Index ETF, BMO Short Provincial Bond Index ETF, BMO Ultra Short-Term Bond ETF and BMO Ultra Short-Term US Bond ETF will be automatically reinvested in additional accumulating units of the applicable BMO ETF. Following each distribution, the number of accumulating units of the applicable BMO ETF will be immediately consolidated so that the number of outstanding accumulating units of the applicable BMO ETF will be the same as the number of outstanding accumulating units before the distribution. Non-resident unitholders may have the number of securities reduced due to withholding tax. Certain BMO ETFs have adopted a distribution reinvestment plan, which provides that a unitholder may elect to automatically reinvest all cash distributions paid on units held by that unitholder in additional units of the applicable BMO ETF in accordance with the terms of the distribution reinvestment plan. For further information, see the distribution policy in the BMO ETFs' prospectus.

**Annualized Distribution Yield:** This yield is calculated by taking the most recent regular distribution, or expected distribution, (excluding additional year end distributions) annualized for frequency, divided by current NAV. The yield calculation does not include reinvested distributions.

**Duration:** A measure of the sensitivity of the price of a fixed income investment to a change in interest rates. Duration is expressed as number of years. The price of a bond with a longer duration would be expected to rise (fall) more than the price of a bond with lower duration when interest rates fall (rise).

**Yield to maturity (YTM):** The total expected return from a bond when it is held until maturity – including all interest, coupon payments, and premium or discount adjustments.

The distribution yield, yield to maturity and duration of each ETF is as of December 31, 2024.

Risk Ratings are determined based on the historical volatility of a BMO ETF as measured by the standard deviation of its performance against its mean. The risk categorization of a BMO ETF may change over time and historical volatility is not indicative of future volatility. Risk Ratings for new BMO ETFs are as per prospectus.

The ETF referred to herein is not sponsored, endorsed, or promoted by MSCI and MSCI bears no liability with respect to the ETF or any index on which such ETF is based. The ETF's prospectus contains a more detailed description of the limited relationship MSCI has with the Manager and any related ETF.

This communication is intended for informational purposes only and is not, and should not be construed as, investment and/or tax advice to any individual. Particular investments and/or trading strategies should be evaluated relative to each individual's circumstances. Individuals should seek the advice of professionals, as appropriate, regarding any particular investment.

Commissions, management fees and expenses (if applicable) all may be associated with investments in mutual funds and ETFs. Trailing commissions may be associated with investments in certain series of securities of mutual funds. Please read the ETF facts, fund facts or prospectus of the relevant mutual fund or ETF before investing. The indicated rates of return are the historical annual compounded total returns including changes in share or unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds and ETFs are not guaranteed, their values change frequently and past performance may not be repeated.

For a summary of the risks of an investment in BMO Mutual Funds or BMO ETFs, please see the specific risks set out in the prospectus of the relevant mutual fund or ETF. BMO ETFs trade like stocks, fluctuate in market value and may trade at a discount to their net asset value, which may increase the risk of loss. Distributions are not guaranteed and are subject to change and/or elimination.

BMO Mutual Funds are offered by BMO Investments Inc., a financial services firm and separate entity from Bank of Montreal. BMO ETFs are managed and administered by BMO Asset Management Inc., an investment fund manager and portfolio manager and separate legal entity from Bank of Montreal.

BMO Global Asset Management is a brand name under which BMO Asset Management Inc. and BMO Investments Inc. operate.

"BMO (M-bar roundel symbol)" is a registered trademark of Bank of Montreal, used under licence.
