A New Industrial Revolution powered by Innovation

The BMO Global Asset Management (GAM) Global Equity Team believes that we are entering a new industrial revolution in the decade to come. Instead of using steam or industrial automation, we believe the next industrial revolution will be powered by cognitive automation based on incredible recent advancements in A.I.

Innovation is Everywhere

Innovation is not the exclusive domain of bio/technology sectors. We have seen an explosion of innovation in all industries as they transform into digital businesses. This can be seen in the surge of patents written in the last three years as a percentage of patents of all times. This warrants our multisector approach to innovation investing.

Some of the most innovative software written today is by A.I. not humans

The most innovative software today for autonomous driving, language comprehension and image recognition is not written by humans. Instead it is powered by machine learning (A.I.). The breakthroughs using this approach have been stunning. Researchers at DeepMind developed AlphaFold, which can predict the 3D structure of proteins based on a sequence of amino acids (see Figure). What took years and millions of dollars in research can now be done as effectively in minutes using cloud computing and artificial intelligence (A.I.) Our cover image was also automated, generated in its entirety by asking an A.I. to envision areas of innovation that it rendered in a photorealistic manner.

Innovation can be Independent of the Economy

CPU Transistor Growth During 2009 Financial Crisis and 2020 Covid-19 Pandemic

source: https://en.wikipedia.org/wiki/transistor_count

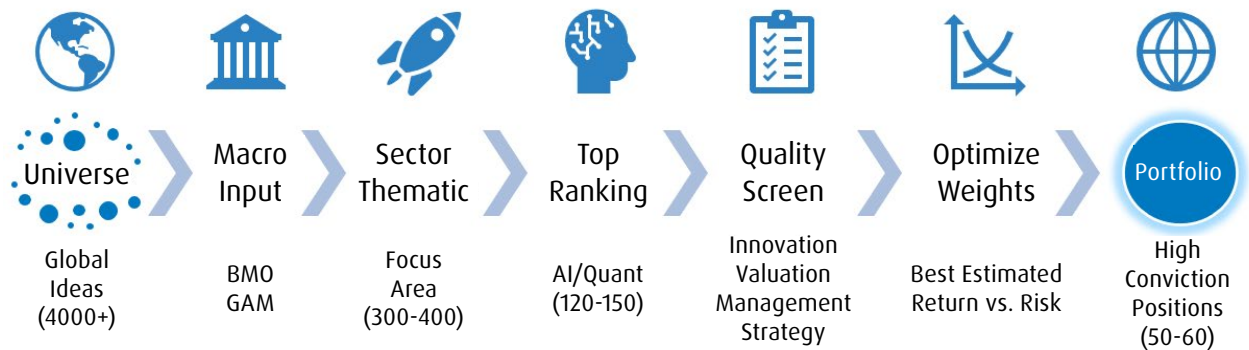

Although we have seen very challenging economic conditions recently, this has not stopped the upward trajectory of innovation. This can be illustrated by the exponential growth of computing power (CPU transistor growth, see Figure), as a proxy for the pipeline of innovation, which continued to have healthy growth despite the last two financial crises.

Investment Process: Balancing Innovative Themes and Sectors

Timing is everything when it comes to investing in innovation, and it is best to be early. It has taken the BMO GAM Global Equity Team decades of work to develop a global network to assist them with their quest to find the most innovative companies in the world. This gives the team an expansive, radar-like ability to identify emerging trends at an early stage. The team can then engage in extensive technical and financial due diligence to understand where to best allocate investment dollars. This is only possible with experience, expertise, and access to a network of global innovators.

Innovation Investment Process – Robust and Actively Managed

Leveraging the Full Benefits of an Expanding BMO GAM Organization

BMO Global Asset Management (BMO GAM) is committed to growing its position in the Canadian investment industry by expanding our ETF, Mutual Fund and Alternative product offerings. BMO GAM has over 70 Investment Professionals, include 16 on our Active Global Equity team who bring a wealth of investing experience across multiple sectors in the pursuit of discovering new global companies who are leaders in innovation.

Award-Winning² Managers who have been Investing in Innovation for Decades

Given how rapidly market sentiment can change, investors need a team with extensive experience managing innovation investments under all market conditions. The BMO GAM Global Equity Team has dealt with volatility in the most challenging environments including the Dot.Com correction (2000), Global Financial Crisis (2008) and recent COVID-related events.
