Definitions

AUM: Assets Under Management

Coupon: yield paid by a fixed income security

Current yield: annual income/price

YTM: The total expected return from a bond when it is held until maturity – including all interest, coupon payments, and premium or discount adjustments.

TTM: Weighted average Term To Maturity of the underlying securities

Hypothetical Distribution Yield: Calculated by taking the most recent regular distribution, or expected distribution, (excluding additional year end distributions) annualized for frequency, divided by current NAV. The yield calculation does not include reinvested distributions.

Duration: sensitivity of price to change in interest rates

Credit rating: assessment of creditworthiness of a borrower ranked by CCC or below (worst) to AAA (best)

Term Breakdown: years to maturity

Tax Equivalent Yield: Tax equivalent yield is an estimate of the interest rate required from a GIC to produce the same after tax return as a bond, and takes into account that a portion of a bonds return may be from a capital gain that receives preferential tax treatment. (After Tax Return/ (1-Marginal Tax Rate).

Tax rate assumptions: marginal tax rate of 53.53% and capital gains inclusion rate of 50%.

<i>Coupon x Initial Investment (\$100)</i>	<i>(YTM - Coupon) x Initial Investment</i>	<i>Income B4 Tax x (1- Marginal Tax Rate)</i>	<i>(Capital Gains B4 Tax x (1-Capital Gains Inclusion Rate)) + ((Capital Gains B4 Tax x (1-Capital Gains Inclusion Rate) x (1-Marginal Tax Rate))</i>	<i>Interest Income (\$) + Capital Gains (\$)</i>
Before Tax Return		After Tax Return		
Interest Income (\$)	Capital Gains (\$)	Interest Income (\$)	Capital Gains (\$)	After Tax Return (\$)

Investments should be evaluated relative to the individual's investment objectives and professional advice should be obtained with respect to any circumstance.

FOR ADVISOR USE ONLY

Commissions, management fees and expenses all may be associated with investments in exchange traded funds. Please read the ETF Facts or prospectus of the BMO ETFs before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. Exchange traded funds are not guaranteed, their values change frequently and past performance may not be repeated.

For a summary of the risks of an investment in the BMO ETFs, please see the specific risks set out in the BMO ETF's prospectus. BMO ETFs trade like stocks, fluctuate in market value and may trade at a discount to their net asset value, which may increase the risk of loss. Distributions are not guaranteed and are subject to change and/or elimination.

BMO ETFs are managed by BMO Asset Management Inc., which is an investment fund manager and a portfolio manager, and a separate legal entity from Bank of Montreal.

BMO Global Asset Management is a brand name under which BMO Asset Management Inc. and BMO Investments Inc. operate. Certain of the products and services offered under the brand name, BMO Global Asset Management, are designed specifically for various categories of investors in Canada and may not be available to all investors. Products and services are only offered to investors in Canada in accordance with applicable laws and regulatory requirements.

The portfolio holdings are subject to change without notice and are not recommendations to buy or sell any particular security.

Past performance is no guarantee of future results. This communication is intended for informational purposes only.

Hypothetical distribution yields are calculated by using the most recent regular distribution, or expected distribution, (which may be based on income, dividends, return of capital, and option premiums, as applicable) and excluding additional year end distributions, and special reinvested distributions) annualized for frequency, divided by current net asset value (NAV). Distribution yield is not an indicator of overall performance and will change based on market conditions, NAV fluctuations, and is not guaranteed.

Distribution yields are calculated by using the most recent regular distribution, or expected distribution, (which may be based on income, dividends, return of capital, and option premiums, as applicable) and excluding additional year end distributions, and special reinvested distributions annualized for frequency, divided by current net asset value (NAV). The yield calculation does not include reinvested distributions. **Distributions are not guaranteed, may fluctuate and are subject to change and/or elimination. Distribution rates may change without notice (up or down) depending on market conditions and NAV fluctuations.** The payment of distributions should not be confused with the BMO ETF's performance, rate of return or yield. If distributions paid by a BMO ETF are greater than the performance of the investment fund, your original investment will shrink. Distributions paid as a result of capital gains realized by a BMO ETF, and income and dividends earned by a BMO ETF, are taxable in your hands in the year they are paid. **Your adjusted cost base will be reduced by the amount of any returns of capital. If your adjusted cost base goes below zero, you will have to pay capital gains tax on the amount below zero.**

Cash distributions, if any, on units of a BMO ETF (other than accumulating units or units subject to a distribution reinvestment plan) are expected to be paid primarily out of dividends or distributions, and other income or gains, received by the BMO ETF less the expenses of the BMO ETF, but may also consist of non-taxable amounts including returns of capital, which may be paid in the manager's sole discretion. To the extent that the expenses of a BMO ETF exceed the income generated by such BMO ETF in any given month, quarter, or year, as the case may be, it is not expected that a monthly, quarterly, or annual distribution will be paid. Distributions, if any, in respect of the accumulating units of BMO Short Corporate Bond Index ETF, BMO Short Federal Bond Index ETF, BMO Short Provincial Bond Index ETF, BMO Ultra Short-Term Bond ETF and BMO Ultra Short-Term US Bond ETF will be automatically reinvested in additional accumulating units of the applicable BMO ETF.

Following each distribution, the number of accumulating units of the applicable BMO ETF will be immediately consolidated so that the number of outstanding accumulating units of the applicable BMO ETF will be the same as the number of outstanding accumulating units before the distribution. Non-resident unitholders may have the number of securities reduced due to withholding tax. Certain BMO ETFs have adopted a distribution reinvestment plan, which provides that a unitholder may elect to automatically reinvest all cash distributions paid on units held by that unitholder in additional units of the applicable BMO ETF in accordance with the terms of the distribution reinvestment plan. For further information, see the distribution policy in the BMO ETFs' prospectus.
